

Subject index

Medical Economics • January through June 1967

Each listing shows title of major article or short item (in italics). First two figures following title indicate date of issue; last figure indicates page number in that issue on which the article or item starts. Back copies of MEDICAL ECONOMICS may be purchased, as long as supply lasts, at \$1.50 each, postpaid.

AIDES

- Choosing a supervisor in a medical office.* 1-9-133
Handling queries about an aide you've fired. 1-23-131
How to spend less time coaching aides. 1-23-104
Easy way to check on an R.N.'s background. 2-6-233
Would a court O.K. your aide's training? 2-6-197
Treating your aide right? Test yourself. 2-20-94
An untapped source of medical aides. 3-6-156
How's your aide's telephone technique? 4-3-219
Providing aides' uniforms as a fringe benefit. 4-3-37
Medicare patients make good collectors. 4-17-211
New ideas for attracting top-notch aides. 4-17-143
Health insurance vs. professional courtesy for aides. 5-1-39
Losing aides? Ask them why. 5-1-131
How to check on your aides' punctuality. 5-15-37
Full-time aides? Never again for me! 6-12-122
How to deal with an aide whose value to you declines. 6-26-49
Is your aide practicing medicine? 6-26-84

CARS

- How to treat automobile winteritis.* 1-9-237
When a passenger is injured while riding in your car. 1-9-157
How do your car costs compare? 1-23-86
When it pays to drop automobile collision insurance. 1-23-253
Saving money on auto insurance when you're away. 2-6-189
Deduct 100% of your car expenses? 2-20-114
Don't keep that car too long! 2-20-119
Expressway driving made easier. 6-12-246
If your car has to be towed. 6-12-246

COLLEAGUES

- What's your real reason for referring?* 1-9-215
When it's smart to consult by phone. 1-9-137
If a colleague practices cut-rate medicine. 1-23-131
Free choice? Not for my patients! 2-6-87
How not to mistreat your doctor-patients. 2-6-215
What's expected of a new doctor in town. 2-6-137
Your liability in referring a prospective patient. 4-3-37
How to get the most from a radiologist. 4-17-163
When you discover a colleague's mistake. 4-17-61
Psychiatric referrals: Handle with care! 5-15-120
Taking the guesswork out of referrals. 5-15-132
This teaching hospital welcomes G.P.s. 5-15-102
My most unforgivable consultants. 6-12-165
Why we cut out professional courtesy. 6-12-96

COLLECTIONS

- How to help slow-paying patients.* 1-9-243
Who's liable for paying your bill? 1-23-232
Collect Medicare fees for service work? 2-6-25
Determining when accounts receivable are too high. 2-6-233
Losing money on liability cases? 2-6-225
A way to collect bills—for 10 per cent. 2-6-238
Why not direct billing for all patients? 2-6-177
How to make bills uncollectible. 4-3-175
Medicare patients make good collectors. 4-17-211
An oral promise to pay another adult's debt. 4-17-39
They collect Medicare money painlessly. 4-17-105
Whether to ask debtors to pay in installments. 4-17-39
One way to cut collection costs. 5-1-207
Stimulating on-the-spot payments. 5-1-39
Cutting down on your aide's billing time. 5-15-37
Internists leave ECG billing to hospitals. 5-29-184
This hospital bills for attendings. 5-29-185
If an M.D. subscribes to a bank card plan. 6-12-49
New way to stimulate prompt payments. 6-12-107
When it's unwise to bill patients every other month. 6-12-49
Using a rubber stamp to encourage larger payments. 6-26-49

CONDENSATIONS

- The Millis Report: must reading.* 1-9-246
How to make the G.O.P. a winner again. 1-23-256
One in 20: the homosexual. 2-6-242
The new radicals. 2-20-266
Debunking "The Doctors." 3-6-265
Seen any gifted children around lately? 3-6-282
Wiped out: an investment horror story. 3-20-262
Medical costs: a report to the President. 4-3-258
Inside Internal Revenue. 4-17-230
Europeans warn against Medicare dangers. 5-1-215
The push for early retirement. 5-15-240
"Our care of the poor is a failure." 5-29-209
Go-go funds are changing the market. 6-12-250
It pays to invest in early growth. 6-26-196

DRUGS

- How to trim your patients' drug bills.* 1-23-174
Risks in using Rx blanks for notes. 3-6-239
The case against anonymous medicine. 4-17-214

EDUCATION

- The Millis Report: must reading.* 1-9-246
"We can train G.P.s in half the time!" 1-9-145
Must the G.P. disappear? 1-23-153
Will your child rate a scholarship? 1-23-286

COMING NEXT ISSUE

The most costly omissions on medical records

A few strokes of your pen can spell the difference between successful malpractice defense and severe penalty. As if to underline this point, the courts have been bearing down hard on four specific record-keeping lapses by doctors. Read what they are in the first of a new series on "Today's Top Malpractice Risks."

Your working hours may well change

Want to know how much you're likely to net by increasing your working hours? Or how much you're apt to lose by shortening them? Statistical answers from M.E.'s Continuing Survey shed new light on the situation in the 10 largest fields of practice. Take a look at the tables in "How Working Hours Affect M.D.s' Incomes."

OPD fees: Are they collectible?

Medicare hasn't been a financial blessing for doctors or patients in the outpatient department. Many OPD doctors who try to collect Part B payments are running into a jungle of red tape. But a few—with hospital help—are struggling out of the morass onto dry ground. Read how they do it in "Medicare Shakes Up the Outpatient M.D.s."

Esidrix® (hydrochlorothiazide CIBA)

INDICATIONS: Edema and hypertension.

CONTRAINDICATIONS: Oliguria, renal shutdown, progressive hepatic disease, and allergy to thiazides.

WARNINGS: Stenosis, hemorrhage, and ulceration of the small bowel have occurred with coated potassium tablets. Discontinue such medication when used with Esidrix if gastrointestinal disturbances arise.

Pay special attention to electrolyte balance of patients with severe renal or hepatic insufficiency. In patients with cirrhosis and ascites, watch for symptoms of impending hepatic coma. Thiazides may decrease glucose tolerance; use cautiously in diabetics. Hyperuricemia may occur but is readily reversed by a uricosuric agent. Lowering of blood pressure may sometimes result in nitrogen retention, particularly in patients with impaired renal function. Dosage titration is necessary in such patients.

PRECAUTIONS: Watch for signs of fluid or electrolyte imbalance. Further electrolyte depletion may cause hypochloremic alkalosis and hypokalemia. Since the latter may precipitate digitalis intoxication, watch carefully patients who are also taking digitalis or its glycosides or those with cardiac arrhythmias. In severe hypokalemia, large oral or intravenous doses of potassium may be required.

A few infants born of mothers who received thiazides during pregnancy have shown bone marrow depression with thrombocytopenia. Hydrochlorothiazide decreases responsiveness to exogenous norepinephrine and increases responsiveness to tubocurarine. Hypotensive episodes under anesthesia have been observed in some patients receiving thiazides.

SIDE EFFECTS: In addition to those above, nausea, anorexia, headache, restlessness, constipation, dizziness, paresthesias, fatigue, increased sweating, cramps in arms and legs, diarrhea, abdominal pain. Rare reactions: purpura with or without thrombocytopenia, skin rash, photosensitivity, urticaria. Sometimes associated with hydrochlorothiazide: leukopenia, agranulocytosis, aplastic anemia, pancreatitis, jaundice, necrotizing vasculitis.

DOSAGE: Tablets should be taken with or immediately after meals. **EDEMA:** Initial—50 to 100 mg once or twice daily for several days. **Maintenance**—25 to 100 mg daily or intermittently. **HYPERTENSION:** Initial—75 mg daily for 1 week. **Maintenance**—25 to 100 mg daily. **Combined therapy**—When necessary, more potent antihypertensives may be added gradually in doses reduced by at least 50 percent.

SUPPLIED: Tablets, 50 mg (yellow, scored) and 25 mg (pink, scored); bottles of 100, 1000 and 5000.

Consult complete literature before prescribing.

in the treatment of

IMPOTENCE

Android®

(thyroid-androgen)
TABLETS

Effectiveness confirmed by another double blind study*

SUMMARY 1.

ANDROID	GOOD TO EXCELLENT 75%
PLACEBO	20%

- Forty cases reported.
- Cites synergism between androgen and thyroid.
- No side effects in patients treated.
- Alleviation of fatigue noted.
- Case histories on 4 patients.
- Although psychotherapy still needed, role of chemotherapy cannot be disputed.

*"Sexual impotence treatment with methyl testosterone - thyroid (ANDROID) a double blind study" - Montesano, Evangelista; Clinical Medicine, April 1966.

CONTRAINDICATIONS—Methyl testosterone is not to be used in malignancy of reproductive organs in male, coronary heart disease. Thyroid is not to be used in heart disease, hypertension unless the metabolic rate is low.

Each yellow tablet contains:
 Methyl Testosterone . . . 2.5 mg.
 Thyroid Ext. (1/6 gr.) . . . 10 mg.
 Glutamic Acid 50 mg.
 Thiamine HCL 10 mg.
 Dose: 1 tablet 3 times daily.
 Available:
 Bottles of 100, 500, 1000.

Each red tablet contains:
 Methyl Testosterone . . . 5.0 mg.
 Thyroid Ext. (1/2 gr.) . . . 30 mg.
 Glutamic Acid 50 mg.
 Thiamine HCL 10 mg.
 Dose: 1 tablet 3 times daily.
 Available:
 Bottles of 100, 500, 1000.

Each orange tablet contains:
 Methyl Testosterone . . . 12.5 mg.
 Thyroid Ext. (1 gr.) . . . 64 mg.
 Glutamic Acid 50 mg.
 Thiamine HCL 10 mg.
 Dose: 1 or 2 tablets daily.
 Available:
 Bottles of 60, 500.

Each white tablet contains:
 Methyl Testosterone . . . 2.5 mg.
 Thyroid Ext. (1/4 gr.) . . . 15 mg.
 Ascorbic Acid (Vit. C) . . . 250 mg.
 Thiamine HCL 25 mg.
 Glutamic Acid 100 mg.
 Pyridoxine HCL 5 mg.
 Niacinamide 75 mg.
 Calcium Pantothenate . . . 10 mg.
 Vitamin B-12 2.5 mcg.
 Riboflavin 5 mg.
 Dose: 2 tablets daily.
 Available:
 Bottles of 60, 500.

milpath®

'MILPATH'-400 (meprobamate 400 mg. + tridihexethyl chloride 25 mg.)

'MILPATH'-200 (meprobamate 200 mg. + tridihexethyl chloride 25 mg.)

Indications: Useful in organic and functional disorders with hypersecretion and hypermotility of g.i. tract, especially when accompanied by anxiety, neurosis, or tension states. Should be used as an adjunct to all other therapeutic measures. **Contraindications:** Tridihexethyl chloride: Urinary bladder-neck obstructions, e.g., prostatic obstruction due to hypertrophy; pyloric obstructions because of reduced motility and tonus; organic cardiospasm (megaesophagus); glaucoma; possibly in stenosing gastric or duodenal ulcers with significant gastric retention. Meprobamate: Previous allergic or idiosyncratic reactions to meprobamate. **Precautions:** Tridihexethyl chloride: Use cautiously in elderly males (possible prostatic hypertrophy). Meprobamate: Carefully supervise dose and amounts prescribed. Consider possible dependence or habituation (reported occasionally after excessive use), particularly in severe psychoneurotics, alcoholics, ex-addicts. Withdraw gradually (1 or 2 weeks) after excessive dosage for weeks or months to avoid recurrence of pre-existing symptoms (e.g., anxiety, anorexia, insomnia) or withdrawal reactions (e.g., vomiting, ataxia, tremors, muscle twitching; rarely, epileptiform seizures, more likely in those with CNS damage or latent convulsive disorders). If drowsiness or visual disturbance occurs, reduce dose and advise against activity requiring alertness (driving, machinery operation). Effects of excess alcohol may be increased. Grand mal seizures possible in persons with both petit and grand mal. Prescribe cautiously in small amounts to patients with suicidal tendencies. **Side Effects:** The following side effects of components may occur with 'Milpath'. **Tridihexethyl chloride:** Severe effects rare on recommended dosage. Anticholinergic effects: dry mouth (fairly frequent at oral doses of 100 mg.), constipation or "bloated" feeling. Possible: tachycardia, dilation of pupils, increased ocular tension, weakness, nausea, vomiting, headache, drowsiness, urinary hesitancy or retention, dizziness. Meprobamate: Drowsiness, sometimes with ataxia, usually controlled by decreasing dosage, occasionally with aid of central stimulants (e.g., amphetamine). Rarely, allergic or idiosyncratic reactions (usually after 1-4 doses); in mild form: itchy, urticarial or erythematous, maculopapular rash, generalized or confined to groin. Acute nonthrombocytopenic purpura with cutaneous petechiae, ecchymoses, peripheral edema and fever, transient leukopenia, and 1 fatal bullous dermatitis (after meprobamate and prednisolone) reported. More severe, very rare hypersensitivity: fever, chills, fainting spells, angioneurotic edema, bronchial spasms, hypotensive crises (1 fatal), anuria, anaphylaxis, stomatitis and proclitis. Treat symptomatically (e.g., epinephrine, antihistamines, possibly hydrocortisone); stop and do not restart the drug. Isolated agranulocytosis, thrombocytopenic purpura, 1 fatal aplastic anemia reported, but only in presence of known toxic drugs. Fast EEG activity, usually after excessive dosage. Impairment of visual accommodation reported by 1 observer. Suicidal attempts may produce drowsiness, lethargy, stupor, ataxia, coma, shock, vasomotor and respiratory collapse, and death. Excessive dosage has led rapidly to sleep, then reduction of vital signs to basal levels. Empty stomach, and if respiration becomes very shallow and slow, cautiously give CNS stimulants (e.g., caffeine, 'Metrazol', amphetamine); also pressor amines if indicated. **Usual Adult Dosage:** 1 'Milpath'-400 tablet, 3 times a day at mealtimes, and 2 at bedtime. For greater anticholinergic effect, 2 'Milpath'-200 tablets, 3 times a day at mealtimes and 2 at bedtime. Doses of meprobamate above 2400 mg. daily not recommended. **Supplied:** In two strengths: 'Milpath'-400: Yellow, scored tablets. 'Milpath'-200: Yellow, coated tablets.

Before prescribing, consult package circular.

Wallace Pharmaceuticals/Cranbury, N.J.

Worse than detergents

The rangy mountaineer who'd been admitted to our hospital was given a room with another man. Shortly after, the floor nurse heard them fighting in their bathroom; so she summoned an orderly and rushed in. "What on earth is the matter?" she yelled. The mountaineer, pointing to the other patient, said wrathfully: "He was sittin' on the spring!" —Charles Miller, M.D.
